PROFESSIONAL SUMMARY

Computer Science graduate and MCA student with strong foundations in software development, data structures, and problem solving. Hands-on experience in designing, building, testing, and optimizing scalable applications using Python and full-stack technologies. Keen to contribute to high-performance product development and continuous improvement.

TECHNICAL SKILLS

Languages: Python, JavaScript, SQL, Java (Basic)

Web Technologies: React.js(basic), Node.js, HTML5, CSS3

Core Concepts: Data Structures, OOP, SDLC, REST API Design

Tools: Git, GitHub, Vite, Google Gemini API

PROFESSIONAL EXPERIENCE

Python Full Stack Developer Intern — Infosys Springboard Nov 2025 – Present

- Developing a full-stack application to detect fake job postings using Python and NLP techniques.
- Building backend APIs, integrating ML/NLP models, and managing database workflows.
- Creating responsive frontend interfaces and connecting them with REST APIs.
- Using Git and GitHub for version control and collaborative development.

Artificial Intelligence & Machine Learning Intern — SmartBridge 2024

- Completed a 240-hour internship in AI & ML with focus on data preprocessing and model building.
- Applied machine learning techniques to solve real-world analytical problems.

PROJECTS

JobCheck – Fake Job Detection System

- Developed an NLP-based system to identify and classify fraudulent job postings.
- Performed data preprocessing, feature extraction, and model evaluation to improve accuracy.
- Integrated the ML model with a web interface using REST APIs.

CareerVibe AI

- Built an AI-driven placement preparation platform using React and TypeScript.
- Integrated Google Gemini API for automated resume reviews and mock interviews.
- Developed Node.js backend services and optimized frontend performance using Vite.

TypeMaster AI

- Developed a typing evaluation system with intelligent feedback and certificate generation.
- Implemented responsive UI using React and TypeScript with Vite build optimization.

Smart Tourist Weather

- Designed a real-time weather forecasting application using JavaScript and Weather APIs.
- Provided live climate data to support travel planning and decision-making.

APIs.

Provided live climate data to support travel planning and decision-making.

EDUCATION

Master of Computer Applications (MCA) — JNTU Gurajada Vizianagaram 2024 – Present

SGPA: 7.87 — Expected Graduation: 2026

B.Sc. Mathematics, Chemistry & Computer Science — Andhra University 2021 – 2024

CGPA: 8.27

CERTIFICATIONS

Python Foundation – Infosys Springboard

Artificial Intelligence & Machine Learning – SmartBridge (240 Hours)

Elite Certification – Industry 4.0 & Industrial IoT, NPTEL (IIT Kharagpur)

ACTIVITIES & LEADERSHIP

Served as Class Representative during undergraduate studies, facilitating communication between peers and faculty.

Built and managed a YouTube channel with 15K+ subscribers.

Grew an Instagram page to 13K+ followers through consistent content creation.
